

Noman AI Studio — Enterprise POS & Inventory

Full-Stack Point of Sale, Smart Inventory & WhatsApp Automation Suite

Developer: Noman Gaurav

Stack: React, Tailwind, Node.js/Python

Status: Production Ready

1. EXECUTIVE SYSTEM OVERVIEW

Enterprise POS & Inventory Management System is a high-performance web application designed for retail hubs, supermarkets, pharmacies, and multi-department stores. Engineered for speed and precision, it combines high-speed barcode checkout with real-time stock monitoring, customer CRM credit (udhaar) ledgers, and direct-to-WhatsApp digital invoicing.

2. CORE FUNCTIONAL MODULES

SPEED BILLING Lightning Checkout

Instant barcode scanner integration (F2 shortcut), line-item discounts, custom item variants, tax auto-calculation, and multi-payment splitting (Cash/Card).

WHATSAPP API Digital Invoicing

Automated digital receipt generation sent straight to the customer's WhatsApp Business profile, dramatically saving paper costs and driving CRM retention.

INVENTORY Stock & Low-Stock Alerts

Real-time batch & expiry tracking, automated low-stock visual badge alerts, supplier order management, and stock audit history logs.

LEDGER Customer CRM & Udhaar

Dedicated customer credit accounts, balance settlement records, automated WhatsApp payment reminders, and buyer profile purchase analytics.

3. BUSINESS INTELLIGENCE & ANALYTICS

REPORTING Daily Profit & Sales Dashboard

Comprehensive real-time analytics displaying net revenue, daily profit margins, top-selling categories, cashier performance logs, and one-click exportable PDF/CSV business statements.

4. TECHNICAL ARCHITECTURE & SYSTEM SECURITY

Layer	Technology	Capability / Benefit
Frontend Framework	React (Vite) + Tailwind CSS	Ultra-fast, responsive UI rendering with sub-100ms checkout interaction.
State Management	Zustand Store	Zero-lag cart item management and synchronized global state.
Backend & REST API	Node.js / Python (FastAPI/Express)	Scalable API architecture handling heavy inventory queries gracefully.
Database Engine	PostgreSQL / SQLite	ACID-compliant storage for seamless transaction logs & ledger protection.
Terminal Security	Role-Based Access Control (RBAC)	Admin vs. Cashier access limits, preventing unauthorized stock edits.

5. IMPLEMENTATION & DELIVERY PACKAGES

Starter POS \$150 3 DAYS DELIVERY - Core POS billing system - Instant barcode lookup - Basic stock management - Downloadable PDF receipts - Responsive UI layout 2 System Revisions	MOST POPULAR Standard Suite \$300 5 DAYS DELIVERY - Full POS + Inventory suite - Customer CRM profile system - Credit / Udhaar balance ledger - Supplier order tracking - Sales & inventory reports 4 System Revisions	Enterprise Suite \$500 7 DAYS DELIVERY - Full POS, Stock & CRM Suite - Automated WhatsApp receipts - Real-time stock alert engine - Daily profit & margin charts - Multi-role access (Admin/Cashier) - Unlimited Revisions & Code
